Collectively we grow

Agriculture is the third largest industry by output and second largest employer in North Queensland. Horticulture is a major subsector with farm gate production worth approximately \$650m per annum.

Bowen-Gumlu is the largest winter vegetable producing region in Queensland. Key commodities produced include tomato, capsicum, mangoes, cucurbits, beans and sweet corn.

Our growers employ approximately 1,500 workers throughout the year with an additional 2,000 during the harvest season.

99% of product leaves the region predominantly for southern markets and 10-15% for foreign export.

Why join BGGA?

BGGA relies on the support of our members and partners to undertake a number of important activities that deliver benefits and make a difference to the success and profitability of local growers and North Queensland's horticulture industry.

By becoming a BGGA member, you're ensuring the association has adequate resources to be able to represent the interests of growers and support and strengthen the region's horticulture sector.
